DIGITAL TILT MOTION SENSOR

“Protects” Expensive Wheels and Tires!

This security upgrade is ideal for protecting a vehicle from theft by detecting when the vehicle is being raised in an attempt to remove the wheels or tow the vehicle. The unit auto calibrates, referencing the vehicle's angle of inclination each time the alarm is armed, ensuring the most accurate tilt sensing possible. The product is perfect for protecting vehicles with upgraded wheels and tires.

from your Smart Phone!**

YOUR CAR CONNECTED

CONNECT YOUR CAR FROM ANYWHERE USING YOUR SMARTPHONE

INTERACTIVE CONTROL

Lock, unlock, and start your vehicle from virtually anywhere in the world when you connect DroneMobile to a Firstech remote start or security system.

DETAILED ACTIVITY FEED

Keep track of your vehicles with DroneMobile's detailed history logs that record your vehicles' activity over a specified period of time.

GPS TRACKING + NOTIFICATIONS

Locate your vehicle(s) and receive alerts via text, e-mail, or push whenever DroneMobile detects speeding, after-hours driving, or geofence violations.

DroneMobile gives you the peace of mind, convenience, and security of staying connected to your car from your smartphone.

Using the DroneMobile App, you can lock your doors or activate your remote start. Perfect for extreme hot or cold weather. As you send commands, AVA, our animated vehicle assistant will confirm your vehicles status

If your car is broken into, DroneMobile will send you an instant notification to your smartphone via text or push notifications. There are also additional alerts making it great for families and small fleet businesses.

Once activated with a premium account, you will be able to track the exact location of your vehicle on a smartphone or PC.

BMW Remote Start Available!
Comfort, Convenience, and Elegance
at your fingertips.

Factory Transmitter Remote Start

Web-programmable remote start solution for BMW/Mini models 2005-2015. NO KEY REQUIRED FOR IMMOBILIZER BYPASS. Includes 'plug & play' installation t-harness. Supports '3 X LOCK' remote start from factory transmitter and can be paired with several aftermarket long-range RF kits and telematics solutions (for smartphone control) sold separately.

***Also available :
One Button Long Range Transmitters
Smart Phone Interface***

DVD ★ VIDEO

HEADRESTS ★ DROP-DOWNS ★ STREAMING AND MORE

REPLACEMENT HEADREST SYSTEMS

The 7" headrest system incorporates HDMI/MHL inputs that give the user direct connection to any HDMI/MHL enabled device. This provides delivery of external high-definition audio and video content without losing a still popular DVD player.

A true vehicle specific program that meets and exceeds the most stringent federal motor safety standards. The color, material, grain pattern and stitching will match your factory headrests. Solid frame construction with multiple assembly shapes to match the original factory headrests !

**You Can ADD-ON
two wireless game
controllers !
(sold separately)**

- Dual replacement custom headrests
(material,color,grain,stitch,piiping matches factory)
- Dual 7" digital monitors with LED back-lighting
- Resolution 800x480
- adjustable viewing angles
- Both monitors incorporate dual channel wireless
headphone transmitters
- Two Wireless remote controls
- Wired headphone inputs on both monitors
- Hide away junction box
- RCA A/V input
- Full band wireless Fm modulator
- RCA A/V output
- RF output for hardwired FM modulation connection
- Game port

REPLACEMENT HEADREST SYSTEMS

The 8" headrest systems integrate tablet technology with our custom headrest DVD systems. We designed the Android OS to be non-removable, to eliminate any concern of damage by taking what would be a standard tablet in and out of a vehicle. Tap into a wi-fi hot-spot and your backseat passengers can immediately enjoy all the features that android has to offer. Surfing the web, playing

- Headrest monitors with 8" digital LED back-lit panels
- Resolution (800x480)
- Touch screen control with user friendly interface
- Android operating system
- Fast dual core processor
- Adjustable viewing angle
- Built in camera and microphone
- Built in memory (8gb-expandable to 32gb)
- HDMI/MHL outputs as well as A/V input and output
- RF output for hand wired Fm modulator connection
- Game port
- built in Wi-Fi (needs 3g/4g) hot-spot to feed internet access while driving outside of coverage
- USB and SD card inputs
- 2 remote controls included with hidden away junction box

HEADREST REPLACEMENT SYSTEMS

Now you can turn your factory screen.....

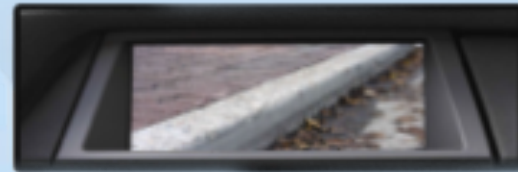

INTO THIS !

Automatic Reverse Camera

See In The Dark ! With Our
Night vision camera

User Selectable Front
Camera

BMW-12 is a rear camera and video integration module for BMW vehicles with the 6 PIN video plug at the back of the screen. The rear view image appears automatically when the vehicle is placed into reverse. The BMW-12 has a dedicated rear view camera input and 3 additional video inputs for external sources such as a DVD player, FLIR NIGHT VISION CAMERA, OR iPod video.

The unit activates automatically in reverse and the video inputs are activated by pressing a factory button on the center console or through the provided monetary switch. Additionally, it has audio switching that, combined with the factory audio input, will provide a true audio and video integration experience.

CAMERA

VIDEO INPUT

Rear View Camera

Automatically displays the rear view camera image on the screen when the vehicle is placed into reverse. The SVS-6 can give rear view camera priority while in reverse or selectable priority to the side view cameras. In addition, the SVS-6 adds the ability to display the rear view camera while in motion and in any gear.

Front View Camera

Add a Front View Camera to the OEM or aftermarket LCD screen*. Great for off-road use or for parking. The camera can be activated at any time and has a configurable automatic time-out feature which is selectable through dip switches.

Blind Spot / Side View Cameras

The Blind Spot or Lane Departure Cameras (Right & Left) will be displayed on the radio screen automatically whenever the turn signal indicator is activated. A configurable 12 second timeout or continuous operation

Trailer Camera

If a trailer system is attached to the vehicle, the SVS-6's video sensing input will automatically bypass the rear camera input while in reverse and display the trailer or 360 degree camera on the OEM or aftermarket LCD screen*.

FLIR Pathfinder II Camera

Add a FLIR Pathfinder II to the OEM or aftermarket LCD screen*. Great for off-road use or night time driving. The camera can be activated at any time and has a configurable automatic time-out feature

Mobileye Lane Departure Warning

Mobileye alerts the driver with audible and visual warnings when there is an unintended departure from the driving lane.

Mobileye Forward Collision Warning

Mobileye alerts the driver seconds before an imminent collision with the vehicle ahead, giving enough time the driver to react and avoid or mitigate an accident.

Mobileye Pedestrian Collision Warning *Including Bicycle Detection*

Mobileye alerts the driver with audible and visual warnings before and imminent collision with a pedestrian or bicyclist.

Mobileye Headway (Following Time) Monitoring and Warning

Mobileye continually monitors your following time from the vehicle ahead and alerts you when the distance becomes unsafe.

Mobileye Intelligent High Beam Control

Mobileye automatically raises and lowers the high beams without inconveniencing oncoming or preceding traffic.

Optional Display Mirror

Mobileye Eyewatch Mirror

Buttons located on the back control the Mobileye functions.

LANE DEPARTURE & FORWARD COLLISION WARNING

LDWS100

Works Great At Night !

LED Night Vision On Front & Rear Cameras

To protect vehicles and passengers, drivers need a rear end crash deterrent. When the vehicle's brakes are applied, the R.E.D. Alert emits four eye-catching half second pulses from the third brake light, then remains on. This dramatically improves the chances of getting the attention of distracted drivers.

Today, getting the attention of following drivers is more difficult than ever. Drivers are distracted by:

- Cell phone conversations
- Text messaging
- Viewing GPS navigation screens
- PDAs,

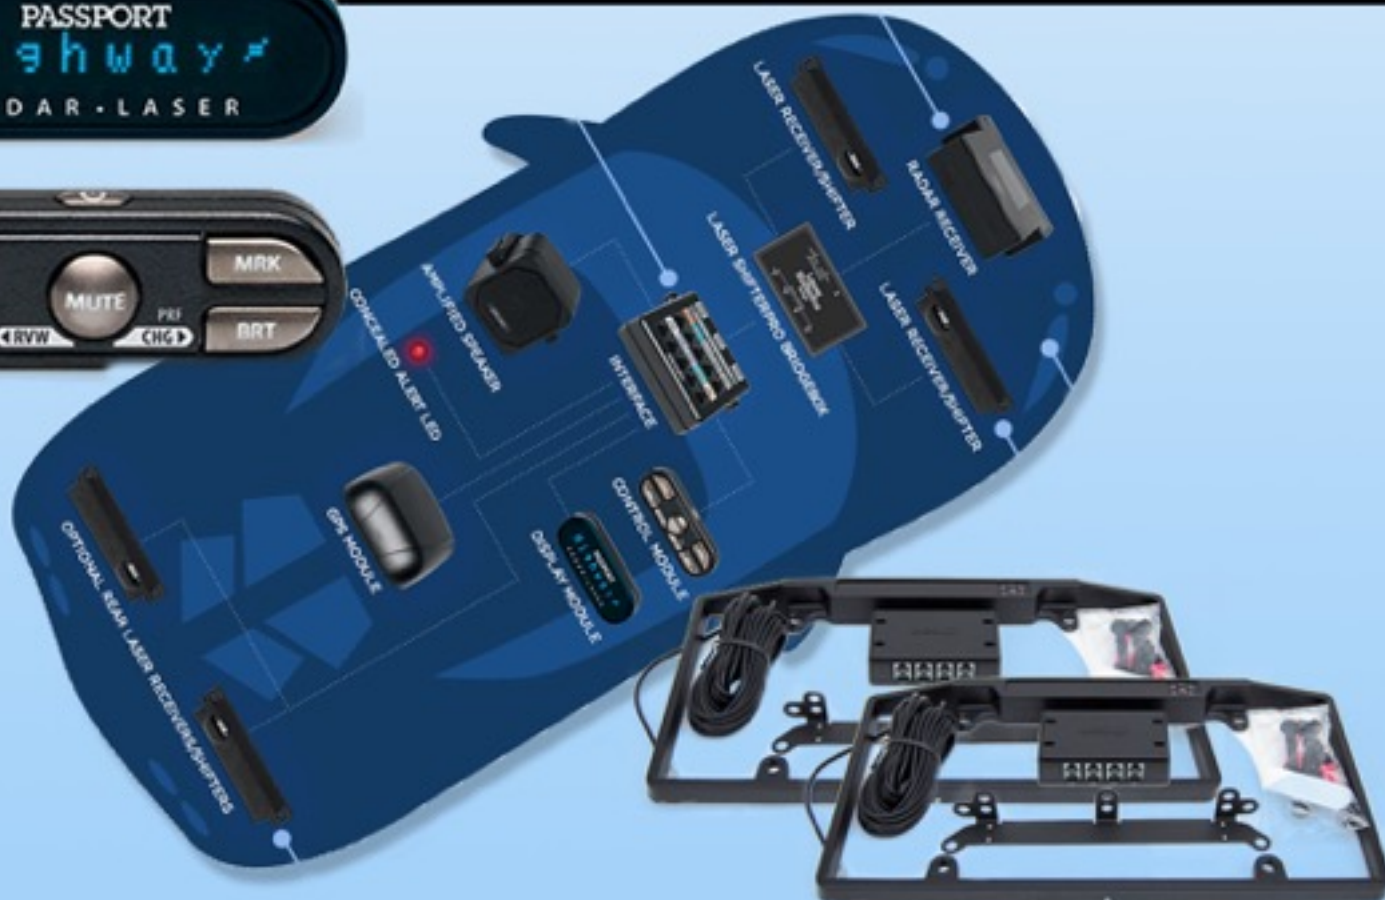

R.E.D. Alert can be installed on virtually any car, truck, or SUV. The pulsing flashes are particularly effective when they are needed most, at night and during severe weather.

COMPLETELY UNDETECTABLE

RADAR DETECTION

Mark Location

The PASSPORT 9500ci's "Mark Location" feature enables the customer to manually mark known speed traps, camera locations, or anything else worth noting. Once stored in its memory, the 9500ci will provide

Speed Trap

Adaptive Signal Processing

Our new Adaptive Signal Processing system uses GPS technology to automatically "learn" (by exact location and frequency) each radar signal and determine if it's a real threat or not. This data is updated real-time during your drive, and
